PROFESSIONAL SUMMARY

Fresh Computer Science graduate from the Arab Open University, undertaking a Penetration Testing training at the National Telecommunication Institute (NTI), developing hands-on skills in Web Application, Network, and Mobile Application Penetration Testing.

WORK EXPERIENCE

- | | |
|--|------------------------------|
| Penetration Testing Trainee | Oct. 2025 – Present |
| National Telecommunication Institute (NTI) | Giza, EG |
| <ul style="list-style-type: none">Conducted full-cycle penetration tests across web applications, network infrastructure, and mobile endpoints, utilizing industry-standard frameworks (PTES).Executed Red Team operations within simulated Active Directory environments, performing lateral movement, privilege escalation, and IDS/firewall evasion.Leveraged Python and Bash scripting to automate reconnaissance workflows and streamline post-exploitation tasks on Linux systems.Authored professional vulnerability assessment reports, translating technical findings into actionable remediation strategies for stakeholders. | |
| Penetration Testing Trainee | Nov. 2024 – Jan. 2025 |
| CyberX | Remote |
| <ul style="list-style-type: none">Conducted black-box penetration testing and vulnerability assessments on web assets, aligning methodologies with the OWASP Top 10.Produced industry-standard reports, classifying findings via CVSS scoring and providing prioritized remediation roadmaps for technical and executive stakeholders. | |
| Cyber Security Trainee | Oct. 2024 – Nov. 2024 |
| National Telecommunication Institute (NTI) | Cairo, EG |
| <ul style="list-style-type: none">Implemented network defense strategies, configuring ACLs, firewall rules, and Intrusion Detection Systems (IDS) to mitigate network-based attacks.Executed system hardening on Linux and Windows endpoints to reduce the attack surface and enforce access control policies.Conducted vulnerability scanning and patch management simulation to secure infrastructure against common CVEs. | |

EDUCATION

Bachelor of Science in Computer Science

January 2025

Arab Open University

Cairo, EG

- Relevant Coursework: Computer Networks, Operating Systems, Computer Architecture, Web Technologies, Cryptography.
- Graduation Project: Developed a mentorship platform integrating secure authentication and Role-Based Access Control (RBAC). Conducted static analysis using MobSF to identify and remediate security vulnerabilities.

SKILLS

- Web Application Penetration Testing: Assessment of OWASP Top 10 & Business Logic Flaws, focusing on Injection Attacks (SQLi/NoSQL/Command Injection), Client-Side Exploitation (XSS/CSRF/HTML Injection), Access Control Vulnerabilities (IDOR/SSRF/CORS), & API Security Testing.
- Network & Infrastructure Penetration Testing: Network Reconnaissance, Vulnerability Assessment, LLMNR/NBT-NS Poisoning & SMB Relaying, Windows & Linux Privilege Escalation, Active Directory Exploitation (Kerberoasting, DCSync, Lateral Movement), & Tunneling/Pivoting.
- Mobile Application Penetration Testing: Android/iOS Static & Dynamic Analysis, Runtime Manipulation (Hooking & Instrumentation), & Security Control Bypasses (SSL Pinning/Root Detection).
- Open-Source Intelligence (OSINT): Attack Surface Mapping, Subdomain Enumeration, Asset Discovery, Metadata Analysis, & Credential Leak Discovery.
- Operating Systems & Infrastructure: Linux & Windows Administration, Firewall Configuration, & Cryptography.
- Scripting & Languages: Python, Bash, PowerShell, SQL, & JavaScript.
- Professional Skills: Critical Thinking, Technical Reporting, Stakeholder Communication, Presentation, Professional Ethics.

CERTIFICATES

- Google Cybersecurity Professional Certificate
- CyberX Penetration Testing Internship Certificate.
- Huawei (HCIA-Security) Certificate.

LANGUAGES

- Arabic: Native
- English: Fluent (C1)
- German: Upper Intermediate (B2)
